What does an architect do?

- Architects design new buildings, extensions or alterations to existing buildings and advise on the restoration and conservation of old properties. They can work on individual buildings or on large redevelopment schemes, and can be responsible for the design of the surrounding landscape and spaces.
- Working closely with clients and users, they make sure that projected designs match requirements and are functional, safe and economical. They usually control a project from start to finish and work with a number of construction professionals, including surveyors and engineers, producing drawings and specifications that the construction team works to.
- There are three main types of architect:
 - building architect;
 - landscape architect;
 - naval architect.

Responsibilities

As an architect, you'll need to:

- produce detailed works, drawings and specifications
- Work with another companies, engineers and designers
- Don't go over budget
- Discuss with your client
- Be patient and like your work

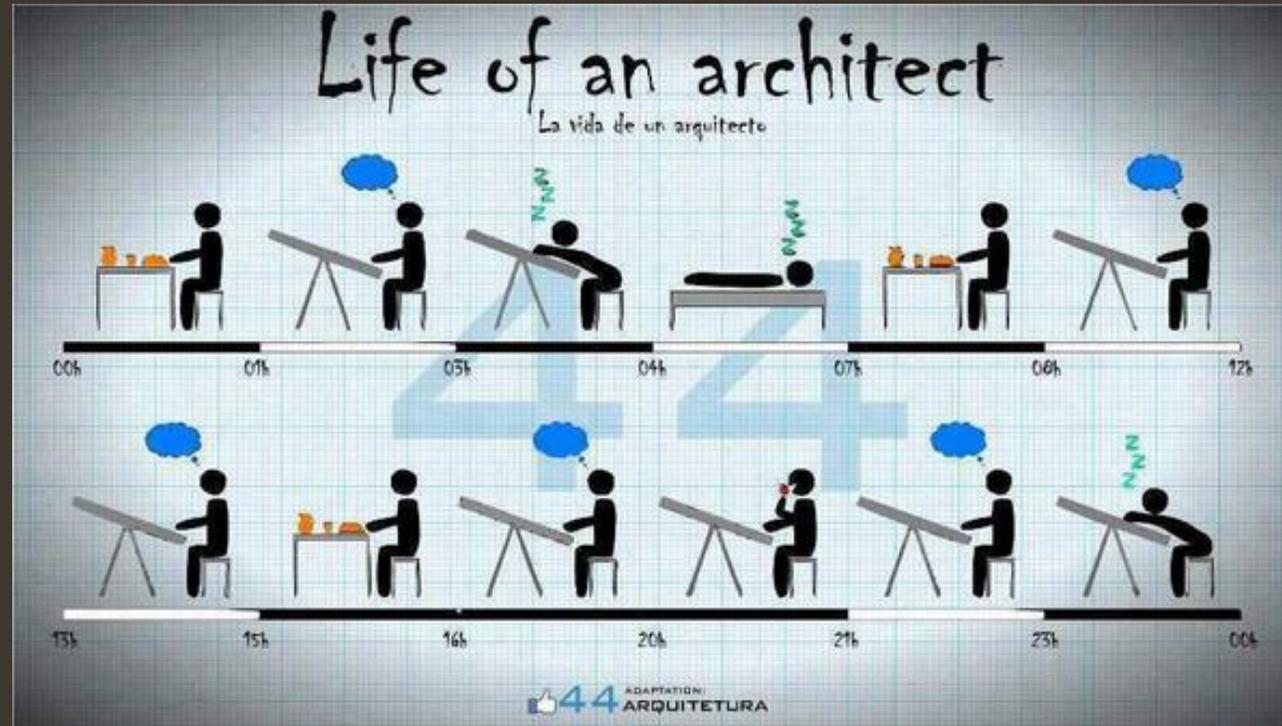

Salary

- The salary range for an architectural assistant/Part II architect is 27,500€ to 35,500€.
 - Fully qualified (Part III) architects earn 35,500€ to 51,500€, depending on their level of experience.
 - The typical salary of a senior associate, partner or director is 57,000€ to 100.000€+.
- Salaries vary according to the location, sector and size of the employing organization.

Working hours

- Your contracted working hours will generally be 9am to 5pm, Monday to Friday, but you need to be prepared to work long hours, including evenings and weekends when a project demands it. But if you are working on your own then you can choose a part-time work.

Qualifications

- **Part 1** - an approved first degree in architecture, which typically takes three or four years;
- **Part 2** - two years of further study for a diploma, further degree or Masters degree in architecture;
- **Part 3** - an examination in professional practice and management, which students may take on completion of the above. This involves a written and speaking examination as well as assessment of the 24 months of practical experience.

Skills

- You will need to show:
- good design and drawing skills
- a strong imagination and the ability to think and create in three dimensions
- a keen interest in buildings and the built environment
- excellent communication skills
- strong teamwork and leadership skills
- a first-rate understanding of construction processes
- mathematical skills
- project management skills
- excellent IT skills, including computer-aided design skills.

Comparison

Pluses

- Your work is related with drawing and math
