

An essay about my city problems by Redas 7D

I like to live in my town, but there are a few problems here. Firstly, the public transport could be better. Secondly, there is a lot of litter around the street. And thirdly, there are no parking places.

If I were a mayor, I would make public transport free for everyone and change old buses to new ones. To force people not to leave their trash in the streets, I would make it illegal to leave anything on the street or a sidewalk. I would also ban smoking, so there would be no cigarettes. I would pass a law –

there should be always enough parking spaces for everyone.

In my view, my actions would affect people's lives very much. If I had to choose one thing, I would ban smoking, because it causes pollution and it's bad for our health.
