

## Problem – Solution Essay by Juozas 7a

My country is great. The people are friendly and healthy, but there are three major problems. Firstly, there is a lot of traffic in the capital. Secondly, lack of facilities for the poor. And thirdly, there is a lot of litter in towns.

If I were a president, I would build more bridges so people could avoid traffic jams. This way I would try to reduce traffic. To reduce poverty, I could make it easier for people to find work. That would lead to a better economy for our country and an increase of life quality.

To reduce the amount of litter in towns, I would provide more local landfills. Encouraging citizens to throw their garbage there. Another solution to the problem would be recycling and

reusing.

In my opinion all of these solutions would make a huge difference to my country, but if I had to choose only one, I would ban littering.

I hope I will become president of my country one day.
