

# The things I would change if I were a mayoress

By Aurėja Bakanovaitė 7A

Every town has some problems. I'm going to talk about some of them in my town and about how would I change them.

So the first problem is that the traffic is really bad. There are a lot of cars, especially after work. Exhaust gas from cars is harmful to the environment. So I would make it easier to use public transport. I would even make it free for children and old

people. I would encourage people to use electric cars, I would also build more electric car charging stations. The second problem is the trash in the city. Sometimes we see that people don't care about environment and throw their litter on the ground. But we have to be smarter than those people, right? To make this easier, I believe, there should be more trash cans around. And the third problem is smoking in public places. I think almost everyone hates that smoke smell. I would ban it because everyone needs more fresh air. So I would create more smoking areas for people who smoke.

These are the problems I would face and try to make our lives easier, but if I had to choose only one I believe I would ban smoking in public places, because fresh air is important.
