My town problems by Urtė 7A

I think Lithuania is a really great place to live! There are not that many problems, but still there are some.

So firstly, I think the streets are dimly lit, some of them not lit at all. It's kind of scary, walking in the evening, when there's no light around you. Secondly, there is a lot of litter on the streets, in the forests, even in the water. And thirdly, there are a lot alcoholics and homeless people on the streets in the evenings.

If I were mayor, I would create a better electricity system in my town, illuminating all the streets and all the districts. To reduce pollution in the streets and forests, I would ban dropping litter and if someone did, they'd pay fines. I would provide more recycle bins as well. For homeless people I'd build a small hostel or a place where they could stay at night and get food.

In my opinion, these solutions would make a huge difference to my town. IT would be a lot safer, and better place to live. But if I could only do one thing, I would ban littering and because the world would get cleaner.
